

LA 410/510

how can microbial ecology inform design for healthier urban environments?

Explore the answer to this question in LA 410/510 Human Health and the Design of the Urban Microbiome, a 2-credit course intended to bridge design and science disciplines.

- Winter Term 2016
- Meets Thursdays 10:00-12:00 in Lawrence 231
- No prerequisites, open to all majors

Instructor Gwynne Mhuireach is a PhD Candidate in Landscape Architecture and active researcher in the Biology and Built Environment Center. She is passionate about uncovering the linkages between design and health, and translating scientific knowledge into real-world solutions.
